

# 1\_ Generating user token + Creating user

Get your sso details from pensil

This will include clientid, clientsecret and communityid

Generate the token for user which you want to authenticate

Refer to [docs](#) for the api

Redirect the user to community with the token, this will log the user in

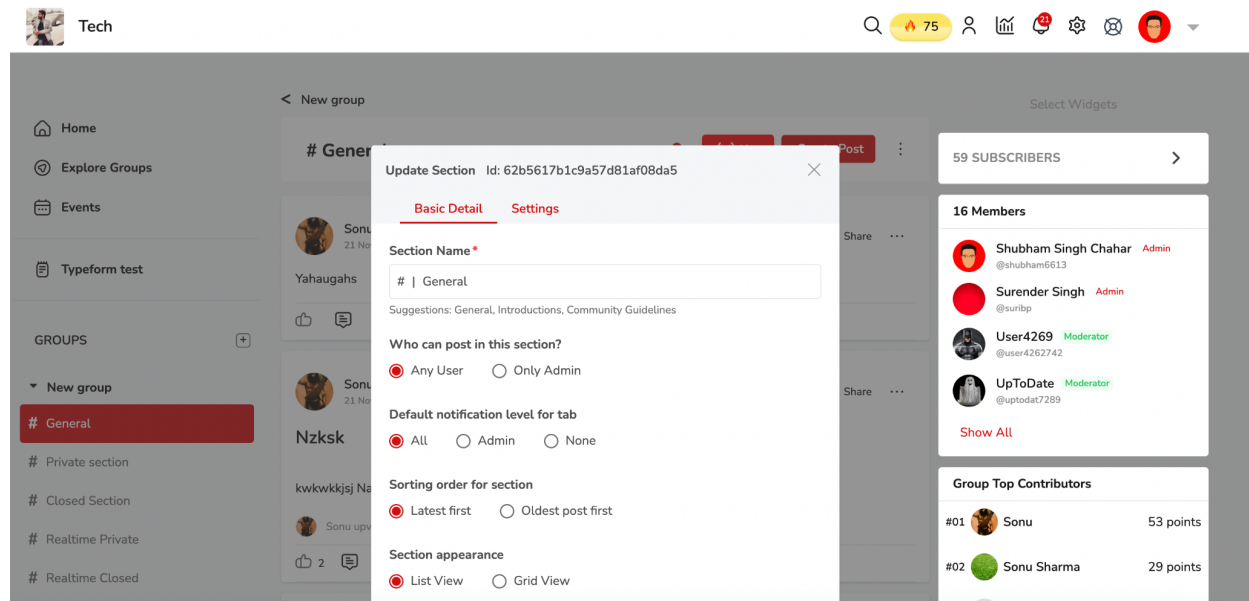

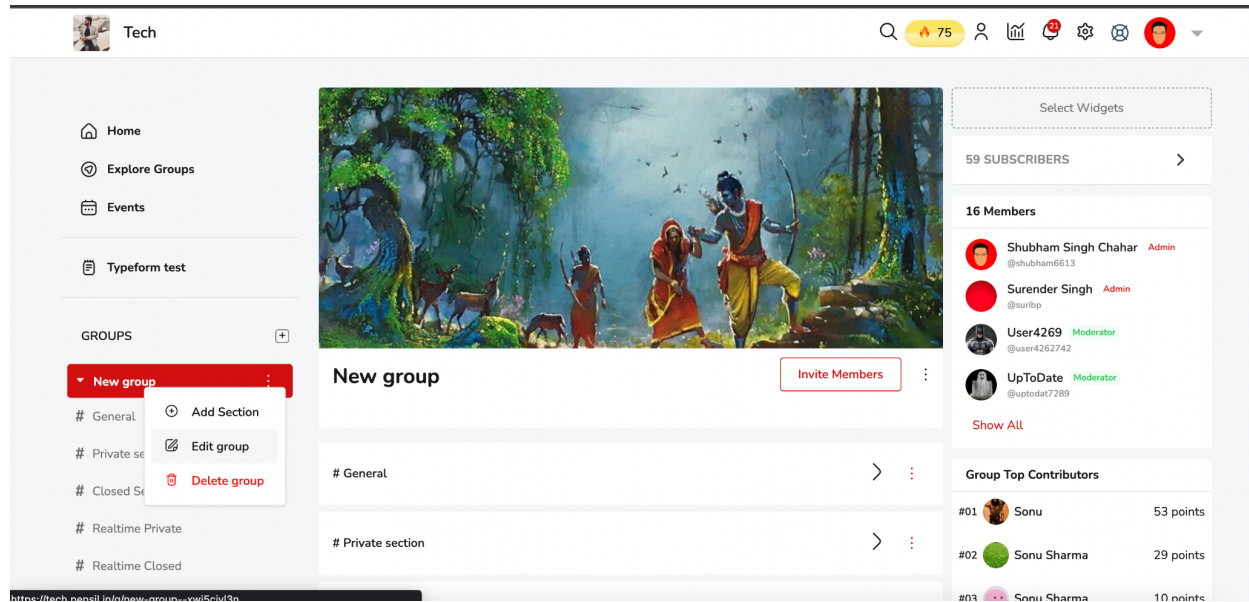

The pattern for redirect will be -

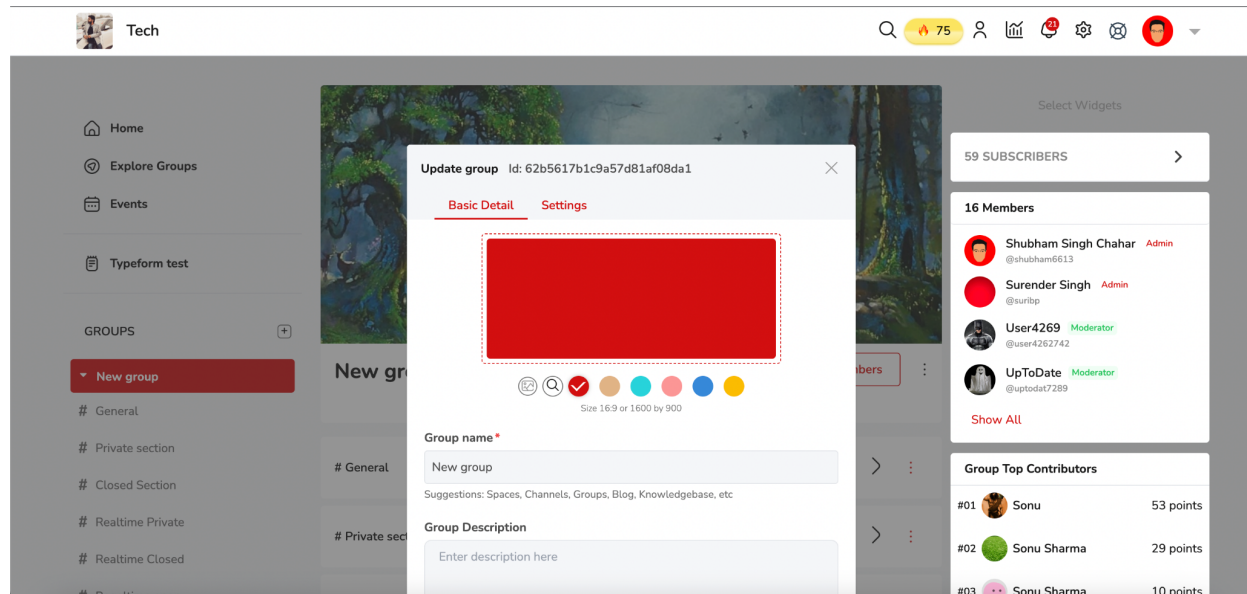

*http://community – address.pensil.in? token =< token >*

# 2\_ Creating post in a section

API [create a post](#)

groupid and tabId can be get from the platform for any group or section (tabId is sectionId)  
Click on edit group or edit section and it shows on top of modal

### 3\_ Displaying section posts using sdk

Follow the readme from our [github repo](#)
